# Jay Bisa

Senior Software Engineer

130 Shirley Street Unit 1 Boston, MA 02119 (978) 846-2181 jay.bisa@gmail.com

## **EXPERIENCE**

## Wayfair, Boston, MA — Senior Software Engineer

SEPTEMBER 2017 - PRESENT

Built scalable .NET web services (4000 req/sec) to determine ship date estimations, by taking into account supplier performance metrics, lead times, and other operational factors

Architected data pipelines (C#, BigQuery, and Kafka) analyzing supplier performance metrics to adjust supplier lead times and 2-day delivery guarantee badges on site. Improved performance by 160% compared to the previous SQL based pipeline.

Architected Wayfair Automated Lead Time, a C# application containing several algorithms (created with business partners), to adjust supplier lead times based on supplier performance. Currently manages 35% of dropship suppliers partnered with Wayfair.

Gave presentations on building analytical systems using BigQuery, microservices architecture, Kafka, Jenkins, test driven development, and other engineering concepts.

## **Wayfair**, Boston, MA — Software Engineer

FEBRUARY 2016 - SEPTEMBER 2017

Helped build a PHP Web API to integrate credit card payment processing through the Paymetric Payment Gateway. This API was used for all of the Wayfair lifestyle brand websites, as well as the iOS and Android apps.

Led implementation and launch of Apple Pay on mobile web upon its iOS 10 release using Apple Pay JS API. Developed the only (at the time) guest checkout solution using Apple Pay to improve customer experience.

## **Veracode**, Burlington, MA — *Software Engineer*

MAY 2013 - JANUARY 2016

Helped build Software Composition Analysis platform, which identifies vulnerabilities within third-party components in Enterprise Applications. Platform was built using Java (RESTful APIs), SQL, and AngularJS.

Improved static analysis scheduling algorithm to distribute jobs more efficiently amongst various servers, which led to faster scan times for customers.

## **EDUCATION**

**Syracuse University,** Syracuse, NY — MS, Computer Science

SEPTEMBER 2011 - MAY 2013

**Worcester Polytechnic Institute,** Worcester, MA — BS, Biomedical Engineering

SEPTEMBER 2006 - May 2010

Minor: Electrical & Computer Engineering

#### **TECHNICAL SKILLS**

Software Development

C#

Iava

SQL

Apache Kafka

Google BigQuery

Redis

Aerospike

Kubernetes

Docker

**Test Automation** 

Design Patterns

Git

#### **SOFT SKILLS**

Leadership Mentoring

Teamwork

Interpersonal Skills

Communication

Adaptability

**Problem Solving** 

Creativity

Work Ethic

Time Management
